MITRATECH

The Platform Purpose-Built for Corporate Legal

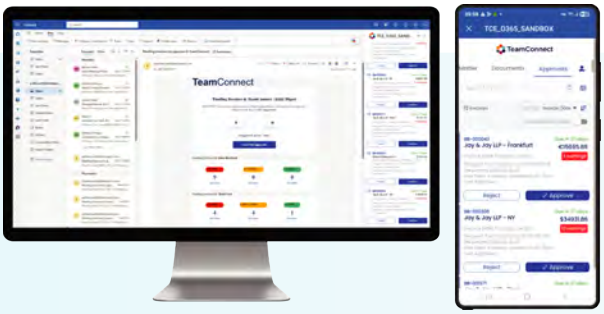
TRUSTED BY LEGAL. **TRANSFORMED BY AI.**

Artificial intelligence is reshaping legal work, but technology alone doesn't drive transformation.

Lasting impact requires clean data, connected systems, governed workflows, a platform designed for the complexity of corporate legal, and a trusted partner to help deliver it.

For decades, Mitratech has partnered with legal departments to solve challenges at scale. Our focus on legal operations shapes everything we build. **Just as important, our team of former practitioners, legal ops experts, technologists, and client success professionals** works alongside customers to design, implement, adopt, and optimize solutions that evolves with your business.

Today, our strategy is grounded in practical, enterprise-ready AI. **We embed intelligence across the legal ecosystem so teams can operate with greater clarity, speed, and control.**



> One of the things I like about Mitratech is that they are **very forward-looking and focused on the roadmap.** The ecosystem is constantly building, so we know that Mitratech has their eyes on the future, which gives us a sense of comfort that they will have the technology that we need to support it."

One Unified Platform. A Full Suite of Best-in-Class Legal Solutions.

MITRATECH

Matter Management & eBilling (TeamConnect)

Centralized legal system of record. Cloud or on-prem.

- Complete visibility across matters, spend, documents, and tasks
- AI-driven processing, review, and insights with ARIES agents
- Enterprise-grade scalability, security, and configurable analytics

"The e-billing implementation alone saved us an average of about 6.7% on legal invoices. In some areas, those cost savings were even higher."

Legal Intake & Workflow Automation (TAP)

Standardize how work enters legal, automate how it moves.

- Dynamic intake with conditional logic and AI-assisted self-service
- Automated workflows with real-time reporting and audit trails
- Secure integrations that maintain legal control and governance

"TAP Workflow Automation helped us cut NDA turnaround time to just two days. That kind of speed and consistency was a game-changer for our business teams."

Spend Management & Managed Bill Review (MBR)

Bring discipline and intelligence to legal spend.

- AI-powered invoice review with expert oversight
- Automated compliance validation and billing guideline enforcement
- Advanced analytics to track firm performance and budget alignment

Reduce outside counsel spend by up to

8–12%.

Legal Hold Technology

Simplify preservation. Strengthen defensibility.

- Automated custodian notifications, reminders, and escalations
- HR and Active Directory integrations for accuracy
- Time-stamped, auditable records integrated with matter management

Cut manual hold administration time by up to

50%.

Document Automation (HotDocs)

Generate complex legal documents with speed and precision.

- Rules-driven generation using approved, standardized language
- Advanced calculations and nested logic for complex scenarios
- Open API and governance controls for enterprise template management

"What used to take hours of drafting now takes minutes — with fewer errors."

Outside Counsel Selection Management (AdvanceLaw)

Generate complex legal documents with speed and precision.

- Data-backed sourcing and objective firm evaluation
- Peer-reviewed performance insights and benchmarking
- Panel optimization aligned with matter and spend data

"AdvanceLaw is a trusted advisor to GCs, helping us find and retain counsel for our most important work."

Built for How Corporate Legal Works Today — and for What's Next

Mitratech delivers a connected foundation for automation, analytics, and AI, giving legal teams the structure and visibility to operate as strategic business partners.

The results are measurable, allowing teams to operate with better precision and lead with data-backed confidence.
