MITRATECH | ARIES™

Trusted by Legal, Transformed by AI

Mitratech's Legal System of Record, Now an Intelligent System of Action.

Not all AI is the same. The difference is what it knows, and what it's built on. For 30+ years, Mitratech has provided the critical infrastructure for the most complex legal organizations to manage their matters, workflows, billing, and operations. **Now, that system of record is an intelligent system of action.**

ARIES™: AI That's Woven Into Your Legal Work

ARIES™ is Mitratech's AI ecosystem: an intelligent fabric woven through our legal solutions, activated by the critical data your team operates on, and co-developed to support how legal teams actually work. It's not siloed from your system of record or chatbot layered on top of your stack. ***It's AI that actually knows your work, not just your industry.***

What ARIES™ Delivers:

Insights

Always-on intelligence that surfaces what matters without being asked. Matter status, financial variances, resourcing bottlenecks, and risk signals. **Intelligence is delivered where it's relevant, not buried in a report.**

Actions

On-demand AI that executes on summarizing documents, creating and closing matters, reviewing invoices, routing intake, and answering questions from your own data. **Tasks that used to take hours are completed in minutes.**

What Makes Mitratech's AI Different:

Your System of Record & Our Institutional Knowledge

Built from decades of partnership and development alongside legal teams, and woven into (not on top of) your system of record. That means every insight reflects your organization's legal history, not just your industry.

Peer-Developed, Enterprise-Validated

Co-developed and validated with hundreds of the world's largest legal teams, delivering capabilities they specifically asked for. By the time ARIES™ ships, it's already been tested at enterprise scale, not designed in a VC lab.

Configured, Compliant, and Defensible by Design

Other AI stops at generating answers. ARIES™ doesn't. It operates within the workflows, audit trails, repositories, and compliance controls that legal work requires, inheriting the permissions and configurations your team has in place. That means every AI-Assisted action holds up in audits, reviews, and court.

Your Data Stays Yours with Enterprise-Grade Security & Deployment

Securely and thoughtfully engineered with customer-isolated architecture. Your data never trains shared models, never mingles with other organizations, and never leaves your governance boundaries.

Trusted by Legal, Transformed by AI

MITRATECH | ARIES™

Standalone AI Isn't Enough for Legal

Not every legal task can or should be executed by AI. Approvals, compliance checkpoints, audit trails and human sign-off, for example, all require deterministic, repeatable, verifiable workflows.

Mitratech gives you both: ARIES™ for AI-driven insights and actions, and a system of record built to hold the line where governance demands it. **Real impact requires clean data, connected systems, and governed workflows. No other vendor in legal gives you both in one platform.**

Mitratech ARIES™ AI for Enterprise Legal

01	02	03	04	05	06
Intake	**Matter Creation**	**Draft & Research**	**Analyze**	**Resolution**	**Billing & Close**
Request arrives	*Setup & structure*	*Document & strategy*	*Live oversight*	*Close & dispose*	*Review & learn*
Hours > minutes	Right structure, first time	Docs understood instantly	Stay current on matters	Close in with AI	Every matter teaches the next

lets change this section to: Every legal team has the data that can make AI powerful. The challenge is that it's scattered, inconsistently maintained, and disconnected from the moments where it would change a decision. **ARIES™ changes that, activating insights and actions at every stage of the matter lifecycle:**

Intake automated with self-service workflows that capture the right details and metadata from the start

Matters created and structured from documents and SOPs. With human approval and audit trail

Documents are summarized and analyzed instantly: key clauses, deadlines, and gaps are surfaced

Matter status, spend patterns, and outside counsel performance surfaced in real time

Financial signals and billing anomalies are flagged before they become write-offs

Firm and spend reports queried in plain language: budgets, timelines, and details on demand

Invoices reviewed, flagged, and adjusted against your billing guidelines automatically

Matters closed with AI: lessons captured, so every matter teaches the next

The governance answer your board is asking for
Customer-isolated architecture, with inherited controls and configurations by design.

Visibility legal ops requires
Real-time insight across matters, spend, and workflows.

The AI your attorneys need
Less coordination, review, and tasks. More time practicing law.

The confidence your Industry demands
A long-term partner, not a new startup bet. Here to build with you for the long haul.

Trusted by Legal, Transformed by AI

MITRATECH | ARIES™

Mitratech ARIES™ AI for Law Firms

Client demands are rising. Margins are tightening. And AI-native competitors are promising to do in minutes what your firm bills hours for. Winning firms are making their existing practice smarter, more connected, and more profitable, without ripping out the workflows that run their business.

ARIES™ meets firms across the full matter lifecycle, from client intake to matter close, without replacing the workflows your practice runs on:

- **Matters structured right from the start:** conflicts flagged, documents generated, deadlines set, intake captured automatically
- **Active work:** AI-assisted drafting, research, and real-time task guidance that keeps billable time from slipping through the cracks
- **Case and matter status monitored continuously:** unbilled work surfaced and proactive alerts issued
- **Every matter closed with full billing captured:** lessons that make the next one faster

The profitability answer your managing partner is asking for

Firms that run on Mitratech capture more of the value they create. Less coordination, fewer unbilled hours, more time on counsel.

The transparency your clients require

Real-time matter visibility and client reporting that builds trust, and wins the next engagement.

The AI your attorneys have been waiting for

Less administrative drag. More time on the work that justifies your rates.

The confidence your industry demands

A long-term partner, not a startup bet. We're here to build with you for the long haul

> We've been able to engage new clients simply because we could demonstrate the benefit of working with us, while we're working with the Mitratech system."

Trusted by Legal. Built for What's Next.

Trusted by Fortune 500 legal departments and global law firms. Co-developed with customers, with built-in governance by design. For teams still figuring out where to start, we built for that, too. ARIES™ activates what you already have, and Mitratech's co-innovation model means you're never navigating it alone.

Other vendors give you intelligence or automation. Mitratech gives you both.
