

## Acuity Mass Tort: Mass Tort, meet total oversight

Designed to manage high-volume, complex workflows associated with mass tort litigation

Acuity ELM is the only enterprise legal management software specifically designed to manage the unique challenges of mass tort litigation. From e-billing, to claims management, to reporting, you need software that cuts your labor overhead and makes analyzing large data sets a snap.

Mass Tort Manager empowers you to monitor and analyze the many costs associated with high-volume litigation. Bring legal expenses down and ensure your defense strategy is coordinated across all of the firms you manage.

### How does Acuity ELM give you a unique Mass Tort advantage?

- Centralize and organize information in an electronic single source of truth
- Review costs and strategy at the individual, firm, case, region, state, or global level
- Identify cost overruns by scrupulously and automatically attending to data
- Control costs by establishing and enforcing billing and audit rules
- Establish best practices across all firms

### How legal teams control mass tort defense expense

- Batch invoicing by claimant, state, and entity enabling outside firms to bill at an individual claimant level while the corporate client manages work at the macro level.
- Batch Review by firm allows the corporate client to process and analyze work performed by a single firm across all of its claims at one time via a single batch invoice.
- Advance Invoice Review tools facilitate swift, in-depth analysis of large batch invoices – reviewers can focus on work performed by one attorney, one type of task for one claimant, or hours billed across all claimants.
- Configurable Billing and Audit Rules can be applied across all firms, at a specific state/region level or at the firm-specific level – providing coordinating counsel greater billing flexibility than the local firms they oversee.
- Global Adjustment Tools enable legal teams to edit groups of invoice line items based on task type, fee type, timekeeper, and expense type.
- Collaboration Toolkit allows for easy sharing of expert witness databases, best practice briefs, and intelligence on opposing counsel.
