

Make Your Billing Process Efficient and Effective

There are more ways for you to get paid than ever before. In addition to the existing payment gateway integrations INSZoom offers, **we've partnered with LawPay**, the solution that **gets you paid more easily, more securely, and 39% faster**.

How does it work?

The integration with LawPay gives our clients the option to accept payments online with just a click of a button, making the billing process efficient, effective and user-friendly.

INSZoom **uses the LawPay “Accept Payments” feature** which seamlessly connects INSZoom to LawPay payment gateway, making it simple to accept online payments for the invoices.

With this new payment integration, INSZoom customers:

-  **Increase efficiency:** When your customers pay online, payments are recorded directly in the INSZoom system
-  **Increase profitability:** By reducing manual effort and time, you can focus on what's important - your customers and business.
-  **Delight their own customers** - Make the customer experience delightful, seamless, error-free and collaborative.
-  **Satisfy all security concerns** because this integration does not require your customers share credit card information.

Adding this integration is an extremely simple two-step process:

1. Login to INSZoom, subscribe to online payments and enable LawPay with its login credentials
2. Choose LawPay as online payment mode while sending invoices to customers or accepting payment.
