MITRATECH

BLACK KITE

Where insight takes flight.

Who we are: Black Kite places business at the center of cyber risk. For cyber risk professionals looking to quantify and maintain visibility of their risk exposure, Black Kite provides a defensible platform that spans the entirety of the third party risk management life cycle.

Unlike other cyber scoring vendors, there's no "secret sauce". With Black Kite, you know exactly where your results come from.

Why? It's really this simple: **you shouldn't be flying blind.**

Cyber Risk Quantification
Know the financial impact of potential breaches for each vendor.

Third Party Risk Management
Understand which vendors pose the highest risk for our organization.

Security Ratings
Quantify and maintain visibility of your cyber risk exposure with comprehensive, letter-grade scoring.

Why us?

Risk in $$$
Using the Open FAIR™ model, we calculate the potential final impact (risk) to your organization in the case of a cyber breach.

Standards-Based Methodology
We use open-source intelligence (ONIST) techniques to collect data from 400+ resources.

Prevent Unrecognized Risk
Reduce the uncertainty around your cyber risk with a high quality platform that does the work for you.

Business Enablement
Make every policy, procedure, and deliverable business-oriented.

Dimensions of Value
We offer the only cyber rating system that provides a complete picture of risk from three dimensions: technical, compliance, and financial.

FINANCIAL

TECHNICAL

COMPLIANCE

Results
- Focus
- Visibility
- Scale
- Trust
- Insight
