MITRATECH + **HOTdocs™**

Keeping You at the Forefront of Document Automation and Assembly Innovation

Take the next step towards optimum efficiency, functionality, and flexibility with HotDocs Advance.

Mitratech HotDocs Advance is a sophisticated and secure document assembly and automation platform that saves you time, reduces operational expenses, helps you better utilize valuable resources, and eliminates the risk of costly errors creeping into your business-critical documents.

With Mitratech HotDocs, You Can:

Rely On A Solution That Grows With Your Business
Built to scale, HotDocs Advance grows with your business as it evolves and your needs change. Its user-friendly UX means that it can be easily expanded to new teams, departments, and offices.

Rest Assured That You're Secure
Be confident your data is safe with upgraded security measures, including Single Sign-On. Easily manage endusers, groups, and permissions with a built-in user system and your SSO Provider.

Keep Your Software Updated Without the Effort
With HotDocs Advance's cloud-based option, any updates or new releases are automatically pushed to your application, without any additional work or individualized IT support from your team.

Create Documents Faster
Create documents and templates faster with enhanced authoring and an improved end-user experience.

Improve Collaboration and Consistency
With HotDocs Advance, multiple users can collaborate on work items within the application, eliminating the time-consuming, back-and-forth editing process, while centralized template management minimizes the risk of error by ensuring your staff always use the most up-to-date document.

Integrate Easily
A comprehensive suite of integration tools enables the seamless integration of document automation into virtually any application.

Navigate Stress-Free
An updated, streamlined, and intuitive interface ensures that both template authors and users can navigate with ease.

Get Work Done on Your Desktop, Laptop, or Tablet
Enjoy the flexibility of browser-based document generation on a variety of devices.
