

Cutting-Edge Technology for 360° IT Risk Management

Deploy powerful IT risk management capabilities within your organization with the help of Mitratesch.

As a business leader, you are no stranger to the importance of IT infrastructure in day-to-day business operations. Furthermore, devices, networks, and users are all crucial to keeping an organization running, but these also burst with an intricate web of threats that risk teams must take into consideration. No easy task, particularly as digital transformation continues and IT assets grow in importance. Creating a culture that is aware of IT risks is always a good place to start.

Mitratesch helps CEOs, CFOs, CISOs, CROs, CCOs, and other decision-makers understand and confidently implement compliance requirements, thoroughly assess risk, obtain detailed risk analytics and reporting, and make risk-aware decisions for their organization – helping to effectively manage risk and reduce risk exposure.

Monitor, detect and prevent risks across your entire environment. Quantify IT risks to truly understand the magnitude of the threat, and set mitigating priorities accordingly to protect the organization.

Furthermore, managing information security is a core part of protecting your IT infrastructure. There are numerous leading standards that organizations might comply with, depending on specific requirements and jurisdiction, for example: ISO/IEC 27001, NIST CyberSecurity Framework or the SOC2 framework. For some organizations, there is the requirement to gain annual certifications, for others, standards and guidelines are followed to demonstrate best practices and confidence in their information security program.

MITRATECH x **cutover**

Learn how Mitratesch's Alyne GRC solution helped Cutover meet the requirements necessary for SOC 2 Type 1 certification.

Power-up your IT risk management program with Mitratesch.

MITRATECH x **SecurityScorecard**

Alyne's powerful cyber and vendor risk management capabilities are now enhanced by SecurityScorecard's cybersecurity vendor risk ratings.

Power-up your risk management program with Mitratesch.

Gain Full Visibility of Your Organization's Security Posture

- Support your risk management program by keeping all key stakeholders aware of relevant IT risks across the entire attack surface, both within your organization and across its external environment (third-parties), with real-time monitoring to dramatically decrease the chance of data breaches.
- Gain a holistic view of IT risks across the organization, both vertically and horizontally.
- Remove siloes between IT departments and risk teams, allowing for a fully centralized data and management of key systems.
- Reduce the likelihood of crises and save on time so your teams can focus on proactive priorities, rather than reactive ones, that inject value to the organization.
- Gain full understanding of the health posture of your IT infrastructure, potential risks and technology-driven opportunities.
- Significant cost reduction. Up to 60% compared with manual solutions.
- Significant time and cost cutting benefits that boost operational efficiency and provide immediate ROI.
- Fully loaded system, ready to use, on day 1.

Value-Generating Training & Team Work

- Develop a security-centric culture across the organization in order to minimize risk exposure and enhance operational resilience.
- Train teams about the importance of risk and compliance by providing a practical framework to identify, manage and mitigate risks.
- Mitratesch's solutions create a transparent and security-centric culture that prioritizes data protection.
- Leverage live dashboards with risks, mitigations, and detailed reporting for easier Board oversight and highly efficient decision-making.

Automation, Ease of Use & Unmatched ROI

- Collaborative and easy-to-use technology helps foster a security-centric culture across the organization. Mitratesch delivers easy-to-use solutions for unprecedented user adoption.
- Deliver automated workflows for better collaboration across security and compliance teams.
- Automate mechanical and error-prone data collection and risk identification tasks.
- Decrease time-to-value with ready to go content that provides an immediate ROI.

Why Mitratesch?

Modern UX Platform Unmatched User Experience

Built on modern and scalable cloud-based technology that enables easy adoption and fast scale-up of users across the organization. Intuitive design and in-app collaboration drives proactive decisions and promotes efficiency.

AI Engine & Agile Development

AI and ML technology powers many core features that intuitively identify risks, understand and interpret documents and calculate Value-at-Risk in minutes across your portfolio, with new cutting-edge features added monthly.

Fast Time-To-Value

Quick and low cost implementation. Out-of-the-box content and assessment templates, pre-mapped to standards, laws and regulations produces fast time-to-value.
