MITRATECH

Empowering Higher Education Institutions with Comprehensive Risk Management

Mitratech's Alyne has teamed up with The Council of Australasian University Directors of Information Technology (CAUDIT) to battle rising cyber security and data privacy threats in higher education.

From producing valuable research to overseeing the intellectual property of students, staff and benefactors, the nature of higher education institutions has made them primary targets for cyber attacks. Meanwhile, emerging technology and methods designed to exploit university databases are leaving older, outdated systems more exposed to vulnerabilities and privacy violations — especially in remote learning environments. The time is now for more resilient and predictive risk management.

Mitratech's Alyne + CAUDIT: Maturing the Cyber Security Posture in the Education Sector

In collaboration with CAUDIT, Mitratech's flagship Governance, Risk and Compliance platform, Alyne, will be empowering Australian Universities with deeper risk metrics and more comprehensive risk profiles. We aim to help these higher education institutions confidently navigate the cyber security landscape and counter ever-evolving threats with full-service access to our GRC offerings.

Customisable, Compliant, and Out-Of-The-Box Cyber Controls

Highly-Scalable, Timely Cyber Risk Assessments

Continuous Monitoring and Analytics (for Internal Systems and Third-Party Vendors)

Automatic Risk Identification and Qualification

Radar Diagram Reports for a Quick and Easy-to-Understand Snapshot of Your Current Threat Landscape

Beyond safeguarding intellectual property and integrity, institutions leveraging preferential access to Mitratech's extended Governance, Risk and Compliance (GRC) solutions via the CAUDIT Strategic Procurement Programme can expect to:

✔ Benchmark the resilience of suppliers through the Shared Vendor Risk Report Portal

✔ Understand and confidently implement compliance requirements

✔ Minimize operational, commercial and reputational risks — and drive risk-aware decisions well into the future

✔ Gain unmatched value with our CAUDIT Special Enterprise pricing arrangement

Get a Look Inside Mitratech's GRC Platform

Alyne
All-In-One GRC Platform

Cloud-native platform, powered by AI and machine learning, with cross-industry applications designed to offer support across the full GRC lifecycle.

Continuity
Compliance - Risk - Vendor

Regulatory technology for the financial services industry. Automation of risk, compliance and vendor management.

ClusterSeven
MRM - IT - EUC

Powerful capabilities for delivering comprehensive MRM, IT and EUC initiatives rapidly and efficiently.

PolicyHub
Policy
