

VALUE REPORT

Construction

Construction businesses can potentially save up \$10,000 annually with Mineral® solutions.

Typical Construction Issues We Resolve

Health & Safety Working Conditions

Are there special requirements for restroom facilities based on the number of employees? Must we provide drinking water to our outdoor workers? Are we required to pay or reimburse employees for PPE? What are the requirements for recording/reporting injuries?

Travel Time

We have a lot of employees who do not have a defined worksite and drive our company trucks to each site. Do we have to pay for the time driving to the site, since it is different every morning? What about employees who go to different sites during the workday?

Fair Labor Standards Act (FLSA)

If we hire a minor, are there restrictions on what type of work they can do? Do our site supervisors or foremen need to be paid overtime?

Americans with Disabilities Act (ADA)/Alcohol

An employee admitted to her supervisor she has a problem with alcohol but says she does not drink while working. Can we require alcohol testing on the job since she works in a safety sensitive position, drives a company vehicle to job sites, and performs work as a construction inspector? An employee is returning from leave after an injury, do we need to adjust their job assignments if they ask? We think one of our employees is too old to do the job now, can we strongly suggest they retire? An employee takes prescription medicine; can we prohibit them from operating equipment?

Trusted Guidance, Content, and Technology
