

# Stop Repeating Yourself

Start automating legal requests today with TAP workflow automation.

## Eliminate High-Volume, Low-Value Work

Reduce the back-and-forth emails, disruptive chats, and lost documents that you know were **just** in that folder last week.

Streamlined workflows and centralized audit trails ensure that everyone has access to the information they need, when they need it — driving faster time-to-value and increased ROI.

Connect legal to the rest of your organization with workflow automation for **20x** faster process execution.

## Workflow Where You Work

Out-of-the-box integrations with the tools that your team uses daily — like Salesforce, Microsoft Teams, and e-signature — means that your workflows will actually get adopted, minimizing disruption and maximizing impact.

“Our Reps spend most of their days in Salesforce, so TAP’s integration makes it a **one-stop-shop** for them — a place for self-service.”

**KRISTINA RODRIGUEZ**  
Director of Revenue Operations  
Mitratesch

## Get the Insights to Make Data-Driven Decisions

Workload allocation, deadlines, error tracking — oh my! Get to the bottom of every question and ensure compliance with centralized reporting, automatic escalations, an in-depth audit trail, and more. TAP delivers both a high-level view of how your team can work better together and a granular look at key matter details (down to each time stamp!).

One TAP customer reported saving **\$3.6 million** a year after introducing automation as a business process management (BPM) tool.

## Enable Self-Sufficiency and Find Time for More Fulfilling Work

No more waiting for project committees or IT. TAP's no-code workflow designer empowers you to automate the processes you know best (and least) in days and weeks, not months and years, letting you get back to the work that you actually want to be doing — faster.

“We had our first workflow in production **within two days** - it was that simple.”

**GREG BENNETT**  
Manager of Legal Operations  
Gilead Sciences

## Not a Programmer? Not a Problem.

The no-code TAP platform empowers even non-technical business users to design, build, publish, and revise workflows quickly and effectively using a drag-and-drop designer, document templates, dynamic routing, and more.
