MITRATECH

Machine Learning: Fuel for Legal Teams

Increase efficiency, drastically reduce legal spend, and save your team time with Mitratech's Artificial Intelligence capabilities.

Minimize Legal Spend & Late Nights

TeamConnect's AI-driven invoice review solution, Invoice IQ, provides legal teams with intuitive invoice adjustment recommendations.

Alongside ML technology, managed bill review experts extend your spend control beyond traditional eBilling rules and capabilities to:

Optimize Time Savings, freeing your team from manual workflows and invoice review.

Eliminate Errors, ensuring accuracy with industry expertise and ML.

Control Savings, giving you full visibility into your legal spend with powerful analytics.
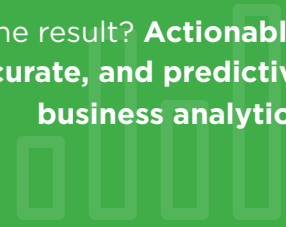

Make Data-Driven Business Decisions

Leverage the power of machine learning to reduce over 50% of the long hours required to review third-party contracts.

Contracts are auto-mapped into the CLM framework using new AI technology while key data is captured simultaneously.

The result? **Actionable, accurate, and predictive business analytics.**

Effective Risk Mitigation

With the help of powerful AI, you can understand laws and identify risks in real-time.

Leverage ready-to-go controls and assessment templates, automatic risk identification, and qualification.

The quick time-to-value benefits translate into accurate risk mitigation efforts and significant cost reductions.
