MITRATECH

Mitratech's Continuity Vendor Comply

Next-generation vendor risk management technology.

VendorComply

The Full Vendor Risk Management Lifecycle Engineered into our Technology?

From risk assessments to contract review, Mitratech's Continuity next-generation VendorComply technology reduces risk exposure from vendors and other third-parties.

The entire lifecycle of vendor risk management is tracked by our system to assess risk on an on-going basis, eliminating the need for high-priced outsourcing, legal and consulting fees.

Compliance requirements are all located in one central repository, in order to keep your vendor information organized and accessible to provide a comprehensive overview of how your organization is managing its vendor risk ratings.

From a strategic standpoint, it's an integrated, cost effective, approach to mitigating your financial institution's vendor risk.

How It Works

Mitratech's Continuity VendorComply technology provides the tools you need to manage your vendors during each stage of the vendor management lifecycle. Due diligence and risk assessments can be completed at any time for new vendors and automated schedules help identify and reduce risk for current vendors. Our user-friendly vendor dashboard provides a useful summary and detailed view of your overall vendor risk profile.

Our secure, cloud-based technology has been designed with the user in mind in order to ensure maximum adoption. Deployment is fast and easy for seamless implementation. Leverage VendorComply's technology today and take your organization to the next level with the help of Mitratech.
